

## Quality policy of Sjótækni ehf.

Sjótækni ehf, places great emphasis on ensuring that the quality of our services is characterized by professionalism and ambition and is exemplary. Our goal is that all our services meet the company's highest quality requirements for professional and high-quality work practices and thus meet the wishes and expectations of our customers.

Sjótækni, is an ocean-oriented contractor that handles the installation, monitoring, maintenance, and service of various structures in the sea and water for companies, institutions and municipalities. We also take on other projects for smaller project purchases.

That is our policy.

- Constantly working on improvements, innovations, and efficiency in operation to ensure the best possible quality of our services. To follow laws and regulations in matters of quality and to go further in that regard when appropriate.
- To promote the quality awareness of employees and subcontractors and to work towards continuous development so that quality, knowledge, and experience reflect all our working methods and work processes.
- That employees and subcontractors receive education and training and work according to the quality policy and quality management of the company. Employees are encouraged to come up with suggestions for improvement.
- That customers, when appropriate, receive education about the company's quality policy and quality management.
- That the purchased services, materials, and products must meet the conditions of the quality policy of Sjótækni ehf.

We set goals in quality management and monitor the results. The goal is to certify the quality management of Sjótækni ehf in accordance with the international standard ISO 9001
