

Environmental policy of Sjótækni ehf.

Sjótækni ehf, places great emphasis on working in harmony with the environment and nature, being a role model and doing good for the country's nature. Our goal is to reduce the company's environmental footprint and encourage our employees and partners to do the same to maintain and improve the legacy that future generations receive in the form of the country's nature. Sjótækni is an ocean-oriented contractor that installs, monitors, maintains and services various structures in the sea and water for companies, institutions and municipalities. We also take on other projects for smaller purchases.

That is our policy.

- Minimizing the environmental impact of operations, making good use of resources, reducing fuel consumption and minimizing waste.
- Complying with laws and regulations and going further when appropriate.
- To promote environmental awareness, to identify opportunities to do better and to work towards continuous development so that knowledge and experience in good interactions with nature reflect all our work processes together with working methods in the present and the future.
- That employees and subcontractors are trained and encouraged to perform all tasks regarding environmental protection and in line with the company's environmental policy and environmental management.
- To aim in a targeted way so that purchased services, materials and products have the least possible environmental impact.

We set environmental goals and monitor the results. Environmental management at Sjótækni ehf, is certified according to the international standard ISO 14001.
